DATE MAILED: 11/17/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b>	<b>Applicant(s)</b>
	10/079,708	HASHIMOTO ET AL
	<b>Examiner</b>	<b>Art Unit</b>
	Adnan M. Mirza	2145

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 09 February 2005.
- 2a) This action is FINAL.                    2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) Claim(s) \_\_\_\_\_ is/are allowed.
- 6) Claim(s) 1-18 is/are rejected.
- 7) Claim(s) \_\_\_\_\_ is/are objected to.
- 8) Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on \_\_\_\_\_ is/are: a) accepted or b) objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All    b) Some \* c) None of:
1. Certified copies of the priority documents have been received.
  2. Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

#### Attachment(s)

- 1) Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date 07/21/04, 07/18/04.
- 4) Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) Notice of Informal Patent Application (PTO-152)
- 6) Other: \_\_\_\_\_.

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ito et al (U.S. 5,671,354) and further in view of Horton (U.S. 5,805,203)

As per claims 1,6 Ito disclosed A communication system, comprising: a plurality of client terminal devices connected to a predetermined network, each client terminal device being assigned a unique identification number (col. 4, lines 21-28); and a communication server machine connected to the network and operable to manager, based on the identification numbers, user information related to each client terminal device which indicates at least conditions under which each client terminal device is connected to the network the conditions including at least a transmission band associated with each client terminal device (col. 2, lines 27-41) and when requested by a user to make a communication with another user, to select a communication application that is suitable for both the user and the another user based on the user information, and to make a connection for communication between the client terminal device of the user and the client terminal device of the another user (col. 2, lines 55-66).

However Ito failed to disclose the conditions including at least a transmission band associated with each client terminal device.

In the same field of endeavor Horton disclosed there are two unique data channels provided to each user, a small fixed bandwidth control channel, and dynamically allocated, shared bandwidth data channel is used to manage the connection between the user and the service node including allocating bandwidth for the data channel and changing the transmission method (col. 3, lines 20-28).

It would have been obvious to one having ordinary skill in the art at the time of the invention was made to have incorporated that there are two unique data channels provided to each user, a small fixed bandwidth control channel, and dynamically allocated, shared bandwidth data channel is used to manage the connection between the user and the service node including allocating bandwidth for the data channel and changing the transmission method to increase the efficiency of managing the network bandwidth and selecting more efficient transmission rate.

2. As per claims 2,9 Ito-Horton disclosed A communication method, comprising: managing user information which indicates at least conditions under which client terminal devices are connected to a predetermined network based on unique identification numbers respectively assigned to the client terminal devices (Ito, col. 2, lines 55-66), the conditions including at least a transmission band associated with each of the client terminal devices (Horton, col. 3, lines 20-28); selecting a communication application that is suitable for both a user and another user with

Art Unit: 2145

which the user desires to communicate based on the user information; and making a connection for communication between the client terminal device of the user and the client terminal device of the another user (Ito, col. 8, lines 6-16).

3. As per claims 3,10 Ito-Horton disclosed A user terminal device, comprising: a list storage unit operable to store a list containing at least identification numbers respectively assigned to terminal devices for communication, addresses of the terminal devices (col. 5, lines 24-35), and conditions for connecting the terminal devices to a network; an application storage unit operable to store a plurality of communication applications corresponding to different conditions for connecting the terminal devices to the network (Ito, col. 2, lines 55-66), the conditions including at least a transmission band associated with each of the terminal devices ( Horton, col. 3, lines 20-28);and a connection controller operable, when a user of the terminal device selects a communication party from the list, to read out from the application storage unit a communication application that meets the conditions for connecting both the user terminal device and the terminal device of the communication party to the network, and to make a connection for communication between the user terminal device and the terminal device of the communication party (Ito, col. 6, lines 10-26).

4. As per claims 4,7,11 Ito-Horton disclosed wherein the list is stored in the list storage unit after being downloaded from a communication server machine connected with the user terminal device through the network (Ito, col. 7, lines 19-27).

5. As per claims 5,8,12,13-18 Ito-Horton disclosed wherein at least one of the list storage unit and the application storage unit is selected from the group consisting of a hard disk drive and a memory card (Ito, col. 4, lines 21-28).

*Response to Arguments*

Applicant's arguments filed 02/09/2005 have been fully considered but they are not persuasive.

Response to applicant's arguments are as follows.

6. Applicant argued that prior art did not disclose, "conditions which include a transmission band.

As to applicant's argument Horton disclosed, "there are two unique data channels provided to each user, a small fixed bandwidth control channel, and dynamically allocated, shared bandwidth data channel is used to manage the connection between the user and the service node including allocating bandwidth for the data channel and changing the transmission method (col. 3, lines 20-28)".

***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Adnan Mirza whose telephone number is (571)-272-3885.

9. The examiner can normally be reached on Monday to Friday during normal business hours. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jason Cardone can be reached on (571)-272-3933. The fax for this group is (703)-

Art Unit: 2145

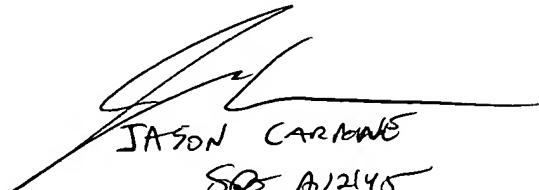

746-7239. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

10. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for un published applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at (866)-217-9197 (toll-free).
